

## The “Encounter” scenarios

There are a number of hypothetical “encounter” scenarios included in the game, which pit two (or more) armies of equal value against each other. This is possible due to the new style OOB, which can assign different victory point values on a unit by unit basis, depending on troop quality, weaponry and other factors, such as whether the unit can deploy skirmishers. Gamers will be able to create their own encounter type scenarios using the scenario editor and either one of the purpose-built army list OOBs or else any other OOB of their choice.

Below is a detailed breakdown of the units involved in each scenario. A page break has been inserted at the end of each scenario in case you wish to print this out to work with. Note: Encounter 9 uses the same force composition as Encounter 5, so no specific break down is included for it.
